

Senior Protein Scientist

We are looking for a senior protein scientist skilled in protein engineering, expression and purification to join our rapidly growing team.

Peak Proteins is a vibrant contract research organisation that provides research services to clients globally. These services include the engineering of tailored proteins for a variety of different end-uses such as biochemical screening, biophysics, diagnostics and biologics drug discovery. In addition, we perform protein structure determination by X-ray crystallography and provide a protein mass spectrometry service. Our passion is to provide clients with the protein related tools and information they need to successfully progress their projects.

We expect the successful candidate to be able to confidently develop and adapt project plans, in consultation with clients, and to manage projects as they progress. Successful project delivery will be achieved through their own experimental work and by working flexibly with team members and researchers in the client organisations; good communication, both written and oral, and team working skills are therefore essential.

To be considered you must be able to demonstrate excellent problem-solving abilities and extensive experience in many of the techniques involved in protein expression and protein purification using a wide range of different systems and methods. Ideally, as a minimum you will have a PhD in Biochemistry or a related discipline. Previous pharmaceutical company or contract research organisation experience is an advantage but is not essential. Importantly however, you should show the enthusiasm and self-motivation required to help drive the business forward and to develop your own scientific and commercial skills. Salary is dependent on the knowledge and experience of the candidate.

Peak Proteins is located on the Alderley Park site in Cheshire; only 18 miles from the heart of Manchester and has easy access to the Peak District, Snowdonia and Lake District national parks.

If you are interested please send your CV and a covering letter to jobs@peakproteins.com by 25th Jun or visit peakproteins.com to find out more.
